

NRPR 104: The Rise of Telehealth

Find Out More: <https://nursing-informatics.com/nrpr104.html>

Overview

- This 5-module course (15 CE credits) introduces the learner to the phenomenal growth and potential of telehealth. Learners will further their knowledge about how telehealth can support value-based, client-centered care in a variety of settings.
- The course is assessed using practical applications of principles and theory and an exploration of telehealth. Throughout the course, nurses are encouraged to explore promise, benefits, and complexities of using telehealth in health promotion, prevention, and continuity of care in practice settings.
- This course is personalized, self-paced and taken entirely online in the privacy and comfort of your own home or office.

Credits: 15 CE hours. **Length:** 5 modules. **Tuition:** \$99

This completely online, self-paced course is approved by the State of California Board of Registered Nursing for full CE credit; CE Provider No. CEP 14891.

Objectives

This course is intended to provide the learner with the opportunity to:

- Examine key principles of Telehealth in healthcare.
- Discuss how Telehealth supports value-based healthcare.
- Analyze how Telehealth can improve access to care.
- Identify how Telehealth can promote continuity of care.
- Describe how Telehealth can improve resource utilization.
- Recognize principles of effective Telehealth implementation.
- Analyze how Telehealth fits into nursing informatics theory and practice.

Modules

- Module 1: Introduction to Telehealth
- Module 2: Telehealth for Improved Access
- Module 3: Telehealth to promote Continuity of Care
- Module 4: Telehealth for Improved Resource Use
- Module 5: Optimal Telehealth Implementation

Upon completion, learners will receive a Board Approved Certificate of Completion for 15 CE credits in digital format.
