

Working with Graphics

For Digital Story telling

Graphics are Central

- Graphics - such as photographs, drawings, paintings, cut outs, icons, stickers, shapes, backgrounds, and so on are very important parts of your digital stories

Storing Your Graphics

- It is helpful to store all of your graphics in special albums in your Photos section of your iPad so you can easily find them when recording
- For instance, create a "**CircleofLife**", "**MyStory**", and "**Artifact**" Album for your three stories

Albums

Edit

Camera Roll

My Photo Stream

Videos

Pic Collage

CircleofLife

MyStory

Artifact

These three albums are for the story projects

This is the opened Circle of Life album

Organizing your graphics in this way will make the whole task of creating and recording your stories much easier and enjoyable.

Photographs

- You can take your own photographs with your iPad camera app and store them in your camera roll
- Then move the ones you will use into the right album

Photographs

- You can also use other photos that have been developed by either:
- Taking a photo of it carefully with your iPad
- Scanning it onto a computer then emailing it to your iPad

Images from Safari

- You can copy images with your iPad from a web site - for instance you can download the circle templates available for the Circle of Life presentation. Simply **tap and hold** on an image and choose **SAVE IMAGE** from the pop-up button. It will be stored within your Photos app folder.

Download Images

- **Circle of Life** - circles are at:
- <https://portfolios.kwantlen.ca/view/view.php?id=37215>
- **Coloured Backgrounds** are at:
- <https://portfolios.kwantlen.ca/view/view.php?id=37230>
- NOTE: These pages are linked so you can access both together

Front Page

- Create a nice front page - you can make a drawing, collage, or fancy layout
- Pho.to Lab app or web based site is great for this - <http://funny.pho.to/>
- Save your image in you're the right album

Sample First Page

Enhancing Photographs

- You can add effects to your photos using various apps such as Pic Collage, DayDream Doodler, and so on.

RECOMMENDED APPS

Educreations

<http://www.educreations.com/>

An interactive whiteboard platform to create animated, narrated easy to design video stories. Free.

Pho.to Lab

A free photo editor with nice effects, frames and filters for your pictures!
